

Steps to Create a Git Repository and Folders

1. Open GitHub and log in.
2. Create a new repository named as your enrollment number.
3. Clone the repository using Git Bash or Command Prompt.
4. Navigate to the repository folder on your local system.
5. Create two folders named Assignment_1 and Assignment_2.
6. Add the folders to Git, commit the changes, and push them to GitHub.
7. Verify on GitHub that the folders are successfully uploaded.
